

# The UN General Assembly's Bias Against Israel

[Every year](#) the UNGA adopts more resolutions against Israel than on the rest of the world *combined*. Serial abusers like China, Cuba, Venezuela, and Pakistan are the subject of zero resolutions at the UNGA.

For instance, in 2024, the UNGA [adopted 18 resolutions targeting Israel](#) — compared with seven resolutions on the entire rest of the world. There was one resolution each on North Korea, Iran, Syria, Myanmar, and the United States (over its embargo on Cuba), and two on Russia. The rest of the world was zero.

The bias against Israel is manifested not only in the extreme number of the resolutions, but also in their one-sided content, hyperbolic language and tone, and absence of any praise as compared to, for example, the resolution on Iran. Redundantly, two resolutions every year condemn Israel for controlling “the Syrian Golan,” and three resolutions endorse terror-infested UNRWA. Yet there’s not a single resolution on China, Sudan, or Venezuela.

**Since 2015, over two-thirds of all country-specific UNGA resolutions targeted Israel**

Israel is also the only country that is the continuous target of three standing UNGA bodies which exist solely to undermine Israel’s security, economic and international standing, and to delegitimize the Jewish state: The Division for Palestinian Rights, the Special Information Programme on Palestine, and the Committee for the Exercise of the Inalienable Rights of the Palestinian People. Mandated to promote a one-sided political agenda, their existence within the UN system is contrary to the principles of the world body.

## UNGA Condemnatory Resolutions (2015-Present)

## The Bottom Line: Western States Need to Fight Back

- Western democracies have a moral obligation to oppose one-sided resolutions targeting the Jewish state while demanding accountability from the world’s worst regimes.
- Western countries should work to defund and eliminate duplicative and biased UN mechanisms targeting Israel.
